

PEARL STREET SURVEY

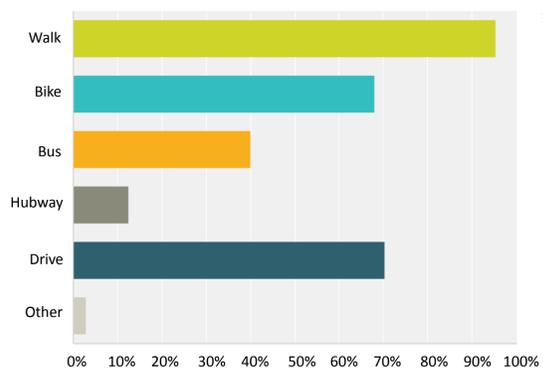

Highlights

Over 300 people took the Pearl Street survey in October/November 2014. Here are some highlights where responses to four questions are broken out by the respondent type. The types of respondents are as follows: live in neighborhood; travel through, work nearby, commute, or casual use; live on Pearl Street; and all respondents.

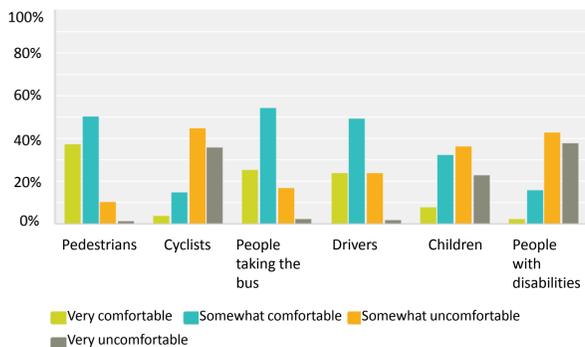

TYPES OF SURVEY RESPONDENTS:

Live in Neighborhood (not including Pearl St.)
175 out of 332

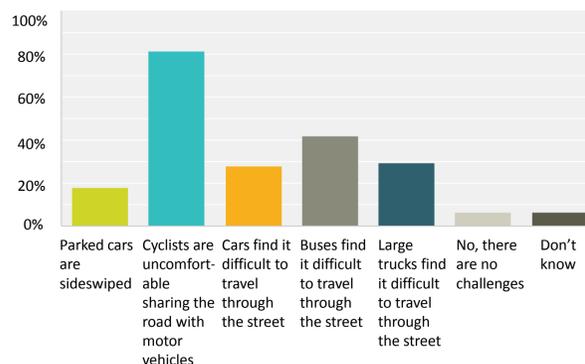

How do you use the street?

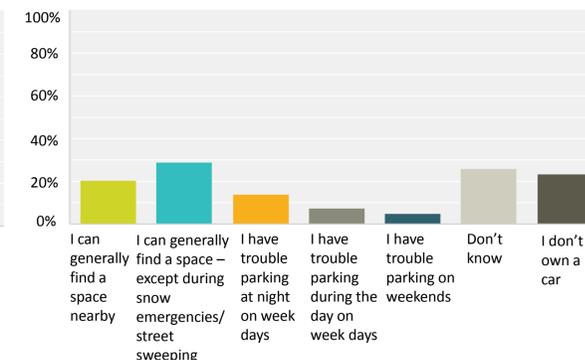

How comfortable (safe, convenient, etc.) is Pearl St. for the following users?

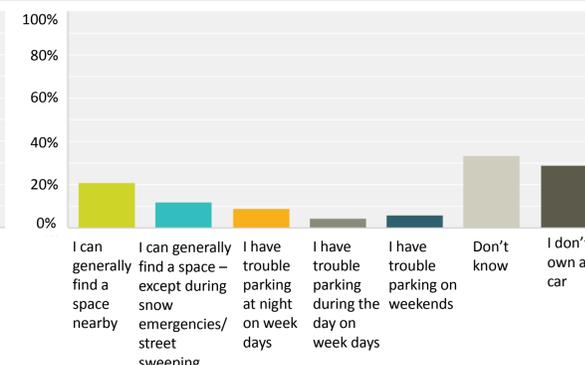

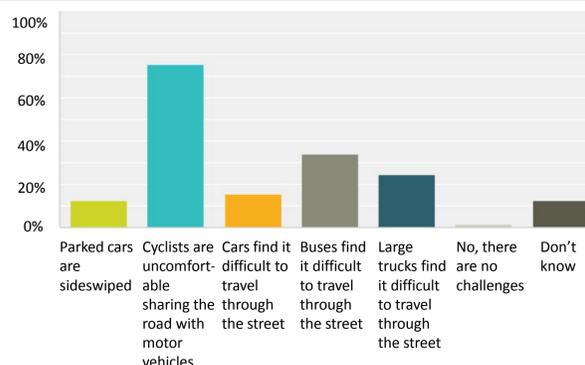

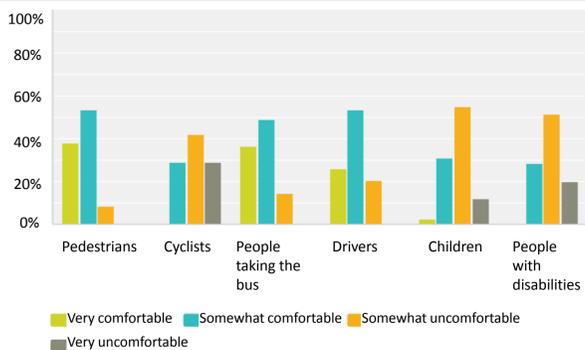

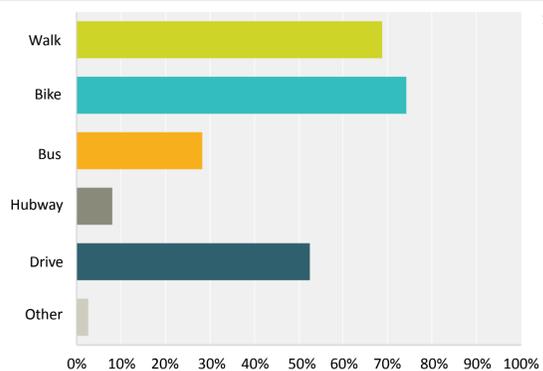

Are there challenges related to the narrow width of the street?

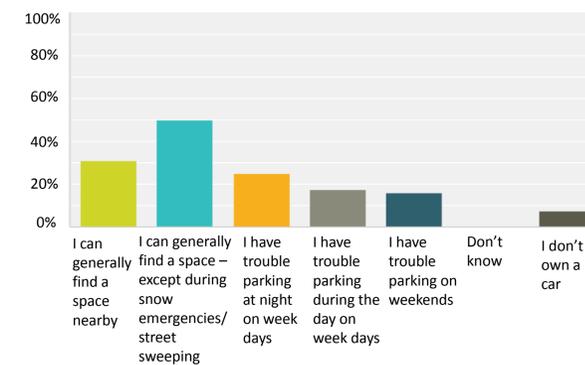

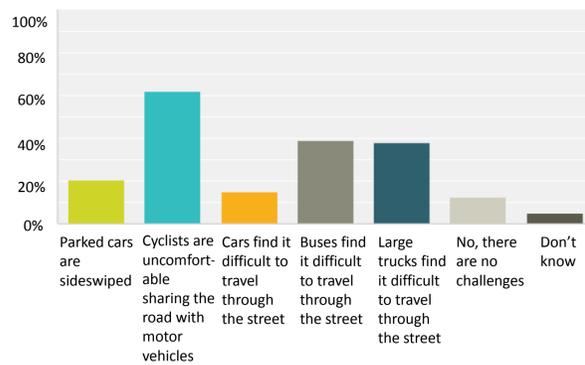

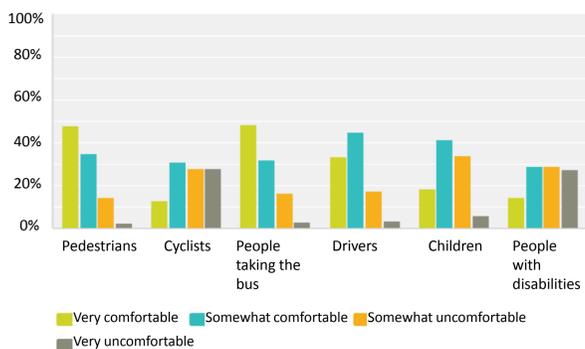

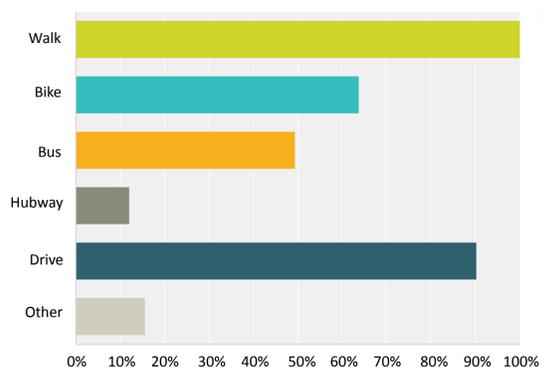

What is your experience with motor vehicle parking availability?

Travel through, work nearby, commute, or use casually
